

AMISH SQUARES QUILT PATTERN

This includes the pattern pieces to make the Amish Shadows Baby Quilt. I found a picture of this quilt in a quilting book, and put together this pattern. Visit my blog for more information on the [making of this quilt](#).

I MAKE IT YOU MAKE IT

By Stefanie Fail

INSTRUCTIONS

The baby quilt was made using 9 squares, pieced together, and then 2 borders added around the edges. This document includes the pattern pieces to make up each square.

PREPARING YOUR PATTERN

1. Gather your materials. You'll need a home printer, scissors, tape, a ruler and paper (8.5"x11" or A4)
2. Using a PDF program (like Adobe Reader), print the last page of this PDF. When you print, make sure that you do not scale to print (at least, not yet) and do not crop.
3. Measure your test square to make sure it is 4" x 4" (10.16cm). If not, adjust your print scale until you can print a test square that measures 4" (10.16cm) square.
4. Once your test square is correct, print all of the pattern pieces.
5. Now you'll need to assemble the 2 pages together, like a puzzle, to make your full pattern. First, to make your pages line up easily, trim your left margin on the second pattern page, by cutting along the dotted borders.
6. Next line up the pages on the dotted margins, matching the triangles (for example, A to A, B to B, etc) to make diamonds. Once assembled, tape your pages together.

INSTRUCTIONS

PREPARING YOUR PATTERN

7. Now cut out your paper pattern on **all** solid lines. You'll have 4 triangles.
8. For this pattern, your seam allowance has **not** been added. If you use a 1/4" seam allowance, you'll need to add it to each piece before you use it to cut your fabric. Add it to all of the edges, of each piece.
9. Now you're ready to cut out your fabric using the pattern pieces!

DECORATIVE HEART

In this document, I've also included a heart shape that can be used to as a template when quilting your squares together. It adds a nice touch to the baby blanket!
